

GLOBAL ENGINEERING CONFERENCE PRESENTS:
ENGINEERING YOUR CREATIVITY

MARCH 10, 2018 | 9-5PM

IMPACT

GEC 2018

Our 7th Annual Global Engineering Conference is a celebration of the engineering discipline and its interconnection to the visual, performing, and applied arts.

Mission Statement

Our mission is to help engineers develop their creativity and apply it through future collaborations between Engineering and The Arts.

Execution

This will be done by demonstrating the influence of analytical thinking within the art industry, and creative thinking within engineering; teach young engineers the importance of design thinking; and show how engineering's contributions to The Arts has made a significant social impact.

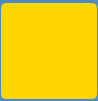

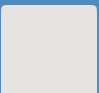

Timeline

- 9:00AM**
Opening Keynote Speaker
